

God Made Veins

We Make Wires

Witness The Invincible Energy

WE MOVE FORWARD WITH EVERY MILESTONE

- 1982** Inception of Vidya Wires Pvt. Ltd
- 1982** Production of enameled wire started with capacity of 100 mt annually
- 1983** Started thicker range of Enameled wire 3mm to 0.6 mm with capacity of 500 mt per annum additionally
- 1995** Started production of bare copper wire with capacity of another 300 mt per annum
- 1999** Launched new products of paper copper wire and strip with capacity of 300 mt per annum at Anand works
- 2004** Started Factory at Dadra (U.T) Bhagwat Wire having capacity of 2000 mt per annum
- 2007** Started unit no 2 at Anand with capacity of 2000 mt annually of Picc
- 2011** Started unit no 3 at Anand total capacity of 8000 mt per annum
- 2019** Capacity enhanced to 18000 mt per annum at single location, Anand unit 3 for all copper product

WE PREPARE FOR THE VICTORY WE WORK TO WIN

STAR PERFORMER NATIONAL AWARD 2016-17

for Exports by EEPIC.
The Award was presented by
Shri C.R.Chaudhari Minister of
State for Commerce,
on 31.05.2018

GLOBAL BUSINESS EXCELLENCE AWARD 2019

This prestigious award was presented
at Vibrant Gujarat 2019 by
Chief Minister of Gujarat, Shri Vijay Rupani and
Shri Giriraj Singh, MSME Minister, Govt. of India

Metamorphosis of Manufacturing

Utilizing our rich experience in the domain of copper wires, we manufacture and supply highly engineered Submersible winding wire and copper sections. The submersible winding wire & Copper section has great significance in the Submersible Pump Industry. Being a leading supplier in the Submersible Pump Industry, we understand the submersible pumps are constantly affected by mechanical corrosion and abrasion. They also face issues like extra heat & higher temperatures at some stages in operations. Additionally, it performs underwater operations which makes it more challenging. That's why we always aim to provide best in term of quality and constantly trying to improve our products to meet the new challenges.

Submersible Winding Wire

We offer highly engineered performance driven Submersible Winding Wire that has been exclusively designed to meet the extreme operational challenges. Our winding wire is built by high tech machinery, in the supervision of our skilled and dedicated staff.

Special Features

- | | |
|-----------------|--|
| Saves Energy | - ETP grade high conductivity annealed copper used |
| Resistant | - High mechanical strength & High tensile strength |
| coil tested | - at 3000 V |
| Heat shock test | - at 150° |
| Easy Winding | - Resistance annealed copper and controlled OD |

Metamorphosis of Manufacturing

Minimum Order Quantity	500 kg
Material	Copper
Insulation Material	Biaxial Oriented Poly Propylene (BOPP)
Diameter	Dia 0.4mm to 2.8mm
Number of Core	3 Core
Type	Insulated
Elongnattion (%)	24 to 34
Brand	VIDYA
Tollerance	0.004 to 0.03mm
Nomina Resistance	137.15 to 2.44 Ohms/km At 20 deg C
Weight of Poly Wrapped	1.467 to 65.228 kg/km

Packing

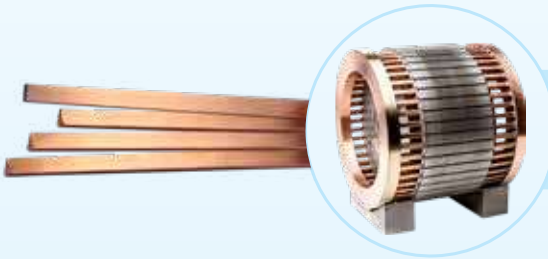

Available in Coil form suitable length as per size, in polythene bag and packed in inner and outer corrugated boxes.

Copper Sections

Copper Sections are well acclaimed among Submersible Pump manufacturers. And its usage is increasing each day because of its Unique and Reliable Properties. And considering to this we are pleased to inform you that we make copper sections of different shapes and sizes both extruded and cold drawn. And we can manufacture it as per our customer's need, want, demand, desire, and Expectations with the help of Advanced Engineering and our skilled and dedicated manpower. We offer all type of Copper Sections which are mainly used in submersible pumps as per national and international standards.

Types of Submersible Copper Sections

V-3, V-4, V-5, V6, V-7, V-8, V-9, V-10

By electing for Vidya Wire products you are Choosing

- Huge range of products and dimensions
- Unified Production
- A firm which is equipped with modern machinery
- A firm which always seeks for technological advancement.
- Highly qualified and dedicated employees
- A firm possessing 4 Decade of expertise of copper production and processing
- Product & Order specific packaging

A firm that always seeks to identify and satisfy the Need, Want, Demand, Desire, and Expectations of Its Clients
